

How to Use the MagicBase Pro Screensaver on Windows

1. Drag the MBP to any location on your computer
2. Open the Windows Control Panel, and select the Appearance and Themes controller.
3. In the Screen Saver control panel, you will have the option of selecting a folder that contains the pictures to use for the screen saver. Choose the MBP_ScreenSaver folder.
4. You will also have the option of changing other settings on your screen saver, like picture size, number of seconds, etc.

It is recommended that you set number of seconds to at least 10. And the screen size should be set to 100%.
